

Bright Ideas, Bold Innovations

Energy Savings & Recycling In One Box!

Venture's innovative Smartpac® service solves your solid waste problem with simple no-fee HID lamp recycling for the United States and Canada:

- Simple - Just send used HID lamps back to Venture, safely in Venture packaging and shipping cartons
- **No cost** to you for the service; simply **pay shipping**
- We reclaim **100%** of the mercury so that none enters the environment
- Solid materials are reprocessed for use as raw materials or safe disposal
- Meets all North American regulatory guidelines

To learn more about recycling rules in your state or province, refer to the website www.lamprecycle.org, or contact your state for guidance.

Venture is committed to reducing energy dependence and pollution. We participate in the EPA-sponsored Energy Star BuildingsSM and Green Lights[®] Ally Partnership programs. Our energy-efficient systems conserve scarce, non-renewable fossil fuels by lowering electrical demand, which also decreases air pollution emitted by utilities. Our exclusive arc tube technology is also safer for the environment, using 25% less mercury than standard probe start metal halide.

As easy as...

1. Buy

Buy lamps from Venture Lighting.

The lamp that gives you clean white light now comes with recycling as an added feature. Just put the used lamps in the Venture Lighting[®] packaging and shipping carton and then seal it.

2. Contact

Contact a *Smartpac* customer representative for your *Smartpac* Return Authorization Number. For details, call 1-888-223-6359 or fax us at 1-800-200-9718 or e-mail us at smartpac@adlt.com.

3. Ship

Ship the lamps back to Venture.

Only lamps shipped in *Venture* packaging will be accepted. If you are in a state or province that promotes recycling, you can use a bill of lading.

Answers to Common Questions...

Do I have to recycle?

Proper disposal of mercury-containing lamps is required by law in all 50 states. In most states, and in Canada, recycling is the preferred option. Visit www.lamprecycle.org or contact your state or province to find out more.

What if I only have a few lamps?

The Smartpac HID lamp recycling service can work for as few or as many lamps as you use. Accumulate your used lamps in the Venture shipping carton and ship them back.

What if my used lamps are not from Venture?

As long as you bought new lamps from Venture, we'll handle the used HID lamps that are safely returned in a Venture lamp carton.

What if I want a certificate of recycling?

We will issue a certificate of recycling if you want it.

Fax: (800) 200-9718

Streetsboro, Ohio 44241 USA

E-mail: smartpac@adlt.com

VentureLighting.com

What does it cost?

You just pay shipping. If you are in a state or province that promotes recycling, you can use a bill of lading to ship the used lamps back to us. Once your used lamps are received, we take care of the recycling, as an added service to you.

Do I need to ship my lamps in Venture packaging and shipping cartons?

Yes. Using Venture® packaging helps to assure that lamps are protected from breakage during transport, carry the proper package markings, and are returned as a "one-for-one" trade for new Venture lamps.

Who keeps the records?

The shipping record is your proof of proper disposal. In addition, we will keep active files of the recycling service for 5 years.

Does Smartpac recycle high pressure sodium lamps?

Yes, with the same easy, hassle free service, if you purchase Venture White-Lux® metal halide conversion lamps designed to be used in HPS fixtures. Incandescent, halogen and fluorescent lamps are not accepted. Broken lamps will not/cannot be accepted by Venture Lighting. It is unsafe to ship broken HID lamps.

Where do I ship the lamps to?

Once you have your *Smartpac* Return Authorization number, then ship the lamps to Venture's Solon, OH location. Call for exact address information.
