HID Technical Information 59-62

Warranty Information 63

Venture Lighting is a worldwide innovator, manufacturer and supplier of energy efficient lighting materials, components, systems, fixtures and controls. Since being founded in 1983 and becoming part of Advanced Lighting Technologies in 1995, Venture Lighting has always been a pioneer in light source technologies. An advocate for industry terms like "LPW" and "Lumen Maintenance", Venture Lighting continues to be a leader in the lighting industry.

An Innovation Leader:

- Full line of LED lamps, luminaires and controls
- Low glare
- High efficacy
- Thermal management
- Precise optics
- Fixtures that are application adaptable

Customers are assured:

- The very best technology
- The highest level of service
- Ease of working with
- Dedicated technical and customer support

Founded in 1983, Venture has built a reputation as the market leader in LED lighting and Metal Halide technology. We are innovators, manufacturers and suppliers of energy-efficient luminaires, lighting components and control systems.

Venture continuously strives to offer its customers, large and small, the best lighting solutions coupled with the very best service and support. Venture has built strong customer relationships that have lasted through the years because of its dynamic and broad product lines combined with a level of customer service and technical support teams unequalled in the industry.

With over 35 years of pioneering light source technologies, Venture Lighting is an innovation-driven designer, manufacturer and marketer of energy efficient lighting products, and services. Transforming the high intensity discharge lighting industry, Venture Lighting's superb quality, world-class service and outstanding technical support continues in the very best LED lighting solutions paired with a best-in-class wireless control system and the highest level of dedicated technical and customer support on all of their products.

Visit VentureLighting.com to find out more about Venture Lighting.

ASSEMBLING AT VENTURE LIGHTING, NORTH AMERICA

Venture Lighting is assembling its LED luminaires in the U.S.A. Currently, Venture Lighting is assembling two different LED product families: Low watt Environ area lighting and VFlood area lighting. Venture Lighting has always strived to exceed customer expectations. Venture believes that assembling luminaires in the USA will allow Venture to provide customers with more options and faster delivery times.

ASSEMBLED IN THE
 **U.S.A.**

Visit Venture's YouTube Channel to watch a short video of the production of LED Highbays in Solon, Ohio.

The Results

- Faster delivery time
- American quality and know-how
- More factory-installed options
- Made-to-order specifications
- Building for a better, brighter future

LED PANEL

*Venture's Select-Pro™ Edge-Lit LED Panels
Available in 2x4, 2x2 and 1x4*

LED Select-Pro® Panels

Venture Lighting's Select-Pro™ edge-lit LED panels are low profile, lightweight, and designed for long life and low maintenance. These thin luminaires are designed to quickly and easily upgrade existing fluorescent fixtures and be more versatile than other LED panels. The high performance LED source is mounted to ensure proper thermal management of the system. Each fixture is capable of changing to 3 different CCT settings (3500K, 4000K, 5000K) and 3 different wattage settings (3 light levels) with a simple slide switch. The flexible selection capability allows for a cost effective method to reduce stocking inventory by 88% (1 SKU instead of 9). All Select-Pro™ panel fixtures are preset to the highest wattage and 4000K CCT.

Benefits and Features

- Change from 3500K, 4000K or 5000K with just the flip of a switch
- Choose from three different wattages with just the flip of a switch
- Reduce inventory SKUs by 88%
- Easy to install
- Battery back-up option available
- Edge-lit, low glare and easy on the eyes
- Designed for upgrading existing fluorescent fixtures or for new construction
- 0-10V DC dimming standard to maximize energy savings
- Rated for damp and dry locations
- IC Rated
- Universal 120-277V, 50/60Hz input

Benefits and Features

- Universal 120-277V, 50/60Hz input
- 0-10VDC dimming standard to maximize energy savings
- Energy saving of up to 75% compared to Compact Fluorescent and Metal Halide
- Upgrade standard CFL and HID 6" or 8" diameter recessed luminaries to high output LED (with 80+ CRI)
- 3X longer life than traditional technology, reducing maintenance costs
- Energy Star Certified (specific models only)
- cULus rated for dry and damp locations
- Lightweight design allows for easy installation
- White and silver trim

EXTERIOR LIGHTING SOLUTIONS

Select-Pro® LED Area Light

LED AREA LIGHTING

Venture Lighting's color temperature selectable and wattage selectable LED Area Light is capable of changing to 3 different CCT settings (3000K, 4000K, 5000K) and 3 different wattage settings (3 light levels) with a simple switch. These field-adjustable fixtures are preset to the highest wattage and 5000K CCT. The flexible selection capability allows for a cost-effective method to reduce stocking inventory by 88% (1 SKU instead of 9). This is an ideal choice for commercial, industrial, or retail applications.

LED AREA LIGHTING

Environ

Venture Lighting's Environ area light fixtures combine a sleek, reliable design with precise ANSI optical distributions to make the ideal upgrade for area/site, roadway, and automotive applications. Perfect for new construction or easy replacement of existing installations.

Benefits and Features

- Rugged die cast housing with a durable powder coat finish
- Vandal resistant polycarbonate lens
- Optical chamber is sealed and gasketed
- Factory installed motion sensor available
- Each fixture will be supplied with a 7-pin receptacle and a shorting cap
- Operating temperature range of -40°C to +40°C
- 10kA surge protection
- 5 year warranty
- 80% Energy savings
- UL Rated for wet locations
- Universal 120-277V or 347-480V, 50/60Hz input
- 0-10VDC dimming standard to maximize energy savings
- IP65 Rated – Suitable for wet locations

3000K color temperature and fixed mounting must be selected for IDA approval

LED AREA LIGHTING

The High Watt Environ fixtures are the ideal fixture for area lighting projects where high performance and precise light distribution is required. The High Watt Environ has been upgraded to 140 lumens per watt (LPW) to increase the delivered light without increasing the required wattage. The higher LPW rating allows for higher light levels without a higher utility bill. This also maximizes the rebate potential with many utilities. In addition to the higher LPW, the Environ fixture light distributions have been redesigned to reduce backlight while providing more light to where it is needed. A Front Row Automotive distribution has been developed specifically to highlight curbside inventory in automotive applications. This distribution, coupled with the other available distributions, provides a complete automotive package.

NOTE: † Lumen maintenance data is based on LED testing per IESNA LM-80 and projected per IESNA TM-21

Benefits and Features

- Electrical: 120-277V, 50/60Hz
- 0-10VDC continuous dimming
- 3 CCT settings: 3000K/4000K/5000K
- 4 wattage settings; 4 different light levels
- Supplied with U-bracket
- Photocell included - no external photocell required
- Long life and low maintenance
- IP65 Rated - suitable for wet locations

CCT and Wattage Selectable Switches

SPECIALTY LED RETROFIT LAMPS

Lowbay - Retrofit Lamp

Order Code	Wattage	Base Type	Lumen Output	Color Temp	CRI	Rated Life (hrs)	Power Factor	THD
LP91312	40W	E26	4800	4000K	≥80	50,000	>0.90	<20%
LP27198	40W	E39	4800	4000K	≥80	50,000	>0.90	<20%

Benefits and Features

- Energy saving replacement for 175W MH or HPS
- Up to 5 times longer life and 80% energy savings compared to HID
- 5 year warranty
- Easy installation
- Reduced maintenance costs
- Perfect for applications such as lowbays, canopies, garages, and general illumination

Photometrics

Dimensions

Dimensions the same for both EX39 and E26 base versions

Wiring

Easy to install - bypass ballast and provide voltage directly to lamp

Accessories (Order as separate line items)

□ SP12714 - Surge protector (120-277V)

WIRELESS CONTROLS & SENSORS

*Environ LED Area Lighting with
Synapse® Twist Lock Controller*

SimplySNAP is a wireless lighting control solution that enables considerable energy savings and lowers operating costs by automating, customizing, and controlling the behavior of lights.

Built for easy installation and use, SimplySNAP doesn't require Internet access and can scale to hundreds of lights, all controlled by a single site controller. SimplySNAP is powered by an encrypted, self-forming, self-healing, 802.15.4 SNAP mesh network and provides a reliable and secure foundation for your lighting network.

SimplySNAP makes commissioning easy with four provisioning options. In addition to manual entry and CSV upload, the Synapse mobile commissioning application, and auto-discovery of unconfigured lights makes commissioning child's play.

Day-to-day operation is just as easy thanks to a browser-based user interface that's accessed through a mobile-friendly Wi-Fi interface. Easy access from a laptop or tablet means your system can be controlled or reconfigured whenever needed. With the optional SimplySNAP Remote Access service, your lighting network can also be managed remotely from anywhere you have an Internet connection.

The system stores power data, alarms, and critical events locally for maintenance and troubleshooting, and provides California Title 24 compliant daily schedules. Occupancy and ambient light sensor integration allows full lighting network customization under a variety of situations.

With programmable schedules and easy setup, SimplySNAP is the perfect solution for lighting control; you just configure it and it runs.

Benefits

- No Internet Required - Site based control
- Web browser based commissioning and control
- Control Individual Fixtures, as well as groups of fixtures based on automated schedules or sensor events
- Secure connection to Site Controller via Wi-Fi and/or LAN
- Automatic software upgrades via encrypted over-the-air communications or USB flash drive
- Graphical representation of power consumption
- Multiple Zones, Behaviors, and Events
- Data and events stored on local Site Controller
- Upgradable to all future SimplySNAP releases

Common Applications

- Parking Lots
- Parking Garages / Decks
- Roadway/Pathway Lighting
- Sports Facilities
- Colleges / Schools

Twist-lock Controller

VentureLighting's Environ LED Area Lighting High Wattage Luminaire

Components

Product Type	Part Number	Product Description
Gateway	WCG-450	SimplySNAP Site Controller, WiFi, Verizon LTE, Metal Enclosure
	WCG-450-CBS-5B	Central Base Station - Nema Enclosure, 5-Button Switch, Includes WCG-450
	WCG-BMS-GW	BMS Gateway for SimplySNAP Site Controller, BACnet, Modbus Compatible
Individual Fixture Controllers	WCN-7P-UNV	7-Pin Twistlock Controller, 6kV Surge and Utility Grade Power Monitoring, Integral Photocell, Digital and Analog Sensor Input, 120-480V
Accessories	5B-SW	Switch, USB, 5-Button, Stand Alone
	ANT-8-REM	Remote Mount SNAP Antenna, Outdoor, Staright, 8.0 dBi Gain
	ANT-2-INT	Indoor Articulating Antenna 2.0 dBi Gain
	ANT-1.5-EXT	Outdoor Straight Antenna 1.5 dBi Gain

CONTROLS - LUTRON

To compliment Venture LED indoor lighting fixtures, Venture Lighting offers a range of Lutron wireless sensors & controllers to maximize energy savings in new & existing commercial buildings. Venture Lighting LED fixture that are compatible with Lutron Wireless Lighting Controls, will have this symbol on the page. To complete most lighting solutions Venture Lighting is happy to offer the following Lutron controls. Contact Venture Lighting or your Venture Lighting Representative for more information.

Product Colors *Select from these color below*

Area Dimming and Sensing

Private office

Dim a group of lights together while also providing manual control. Save additional energy with daylight harvesting.

Simple Switching

Restroom

Occupancy sensors control all lights together by switching lights on and off in response to room occupancy.

Individual fixture dimming and sensing

Lutron Controls *PowPack - Wireless (RF) Controllers*

Part Number	Description
RMJS-16R-DV-B	Control lighting zone in the space, 16 amp, On/ Off
RMJS-5R-DV-B	Control lighting zone in the space, 5 amp, On/ Off
RMJS-8T-DV-B	Control 0-10 V lighting zone in the space, 8 amp, On/ Off, 0-10v dimming
RMJS-CCO1-24-B	Control additional contact closure output, VAV terminal unit
RMJS-20R-DV-B	Control each 20 A receptacle circuit you want to control, 20A receptacle circuit
FCJS-010	Control each fixture in the space, 1 amp per fixture, 0-10v dimming
FCJS-010-BULK8	Control each fixture in the space, 1 amp per fixture, 0-10v dimmingBlack

Lutron Sensors *Radio Powr Savr - Occupancy, Vacancy & Daylight Sensors*

Part Number	Description
LRF2-OCR2B-P-WH	Ceiling-mount, 360° field-of-view, occupancy/vacancy sensor
LRF2-OWLB-P-WH	Wall-mount, 180° field-of-view, occupancy/vacancy sensor
LRF2-VWLB-P-WH	Wall-mount, 180° field-of-view, sensor vacancy only
LRF2-OKLB-P-WH	Corner-mount, 90° field-of-view, occupancy/vacancy sensor
LRF2-VKLB-P-WH	Corner-mount, 90° field-of-view, vacancy only sensor
LRF2-VHLB-P-WH	Hallway, vacancy only sensor
LRF2-DCRB-WH	Ceiling-mount daylight sensor
DFCSJ-OEM-RF	DALI/EcoSystem In-Fixture RF Module with Integral Occ/Daylight Sensor
DFCSJ-OEM-OCC	DALI/EcoSystem In-Fixture RF Module Only

Lutron Switches *Maestro - Wireless Wall Mounted Switches & Dimmers*

Part Number	Description
MRF2S-6ANS-XX	Vive Maestro Wireless Switch 6 AMP (Neutral Needed) On/Off
MRF2S-8S-DV-XX	Maestro Wireless 8 Amp Multi-location Switch On/ Off
MRF2S-8ANS-120-XX	8A lighting, 5.8A fan (1/4HP motor), spec grade, 120V (Neutral Needed) On/ Off
MRF2S-6CL-XX	150W dimmable CFL/LED, 600W incandescent, halogen, 600VA MLV, 120V, no neutral
MRF2S-6ELV-XX	600W ELV, 120V (Electric Low Voltage)

Lutron Remotes and Accessories *Pico*

Part Number	Description
PJ2-2BRL-GXX-L01	2-button with raise/lower
PJ2-2B-GXX-L01	2-button
PJ2-3BRL-GXX-L01	3-button with raise/lower
PJ2-3B-GXX-L01	3-button
CW-1-XX	Claro 1-gang wall plate
CW-2-XX	Claro 2-gang wall plate
PICO-WBX-ADAPT	wireless remote wall box adapter
L-PED1-XX	wireless remote single pedestal
L-PED2-XX	wireless remote double pedestal

POLE OPTIONS

VSSS Square Straight Steel Pole

POLE OPTIONS FOR VENTURE LED AREA LIGHTING

212W VFlood

300W Select-Pro®
Area Light

300W Environ

Complete the Package

Venture Lighting's LED area lighting luminaries include the VFlood and the Environ families.

VFlood

Available in 212W, these fixtures are assembled in the U.S. at our manufacturing center in greater Cleveland, Ohio.

- Rugged die cast housing with a durable powder coat finish
- Vandal resistant tempered glass lens
- Twist lock photocell receptacle and shorting cap included with the fixture
- Operating temperature range of -40° C to 40° C
- 10kA surge protection
- 110W DesignLights Consortium® (DLC) qualified
- 0-10V DC dimming standard

Environ

Available in 200W, 300W and 480W, these fixtures are assembled in the U.S.A. at our manufacturing center in greater Cleveland, Ohio.

Low profile design featuring long life and low maintenance. Perfect for new construction and easy replacement of existing area lighting fixtures. The robust design paired with a variety of mounting options makes them ideal for locations, such as, retail, parking and street lighting.

- Rugged die cast housing with a durable powder coat finish
- Vandal resistant polycarbonate lens
- Optical chamber is sealed and gasketed
- Capable of adding motion sensor (factory installed)
- Each fixture will be supplied with a 7-pin receptacle and a shorting cap
- Operating temperature range of -40° C to 40° C
- 10kA surge protection
- 5 year warranty
- 80% Energy Savings
- UL Rated for wet locations
- Universal 120-277V 50/60 Hz input or 347-480V input
- 0-10VDC dimming standard to maximize energy savings

WARNING: Do not install light pole without luminaire.

Dimensions in Inches

Pole

Pole shaft shall be weldable-grade, cold-rolled, commercial quality carbon steel tubing conforming to ASTM A500 Grade B. Options include 11 gauge and 7 gauge. All Welds shall conform to AWS D1.2 using ER70S-6 electrodes.

Base Style

4-Bolt Steel Plate Base Flange of fabricated hot rolled carbon steel conforming to ASTM A36 or equivalent (36 ksi minimum yield) with 2-piece Base Cover and attaching hardware. Base Cover will be fabricated from ABS plastic or metal materials.

Handhole

Reinforced, 3" x 5" Handhole with Cover, Stainless Steel Screw and Backbar. A Grounding Provision incorporating a tapped 1/2"-13NC hole will be welded to the handhole frame.

Anchorage

Anchorage Kit will include four (4) L-shaped Steel Anchor Bolts conforming to AASHTO M314-90 Grade 55. Ten inches (10") of threaded end will be galvanized per ASTM A153. Kits will contain eight (8) Hex Nuts, four (4) Lock Washers, and eight (8) Flat Washers (all components Galvanized Steel). A bolt circle template will be provided.

Vibration Damper

If determined necessary by pole manufacturer, a top-mount, field installed First Mode Vibration Damper will be provided. Customer specification of the damper is available.

Mounting Designation

Side Drill Mount

For Side Drill Mount applications specify luminaire type, quantity and orientation. A luminaire drilling template must be supplied at time of order.

Tenon Mount

For Tenon Mount applications specify both Tenon diameter (2.375", 2.875", 3.5", 4", etc.) and length (3", 4", 5", 6", etc.).

Catalog Number System

The catalog number for Venture Lighting poles utilizes the following identification system.

MOUNTING BUTT BASE
 HEIGHT SQ. STYLE FINISH
 V S S S - 4 -
 SHAFT WALL TOP GALV.
 ASSEMBLY GAUGE SQ.

Catalog Number Example -

VSSS 20 D 5 - 4 - BA

Square Straight Steel, 20' Mounting Height,
7 Gauge, 5" Butt Square, No Taper,
4-Bolt Base, Black Powder Coat Finish.

Wall Gauge

B = 11 Gauge
D = 7 Gauge

Butt Square

$$\begin{aligned} 4 &= 4'' \\ 5 &= 5'' \\ 6 &= 6'' \end{aligned}$$

Top Square

- = No Taper

Base Style

4 = 4-Bolt Anchor Base

Finish

BA = Black Powder Coat
BH = White Powder Coat
BM = Dark Bronze Powder Coat
BV = Dark Green Powder Coat
GC = Gray Powder Coat
★ ★ = Specify Finish
00 = Galvanized Only (*No Powder Coat*)

Galvanization

G = Galvanized

Code "G" to be used only if pole is to be specified
"Powder Paint Over Galvanized" or "Galvanized
Only".

ABS plastic base covers are standard in all VSSS poles specified in BA-Black, BM-Dark Bronze, and BH-White. VSSS poles specified in all other colors will be manufactured of metal materials. Metal Base Covers for poles in BA, BM and BH can be specified.

WARNING: Do not install light pole without luminaire.

Dimensions in Inches

Pole

Pole shaft shall be weldable-grade, hot-rolled, commercial quality carbon steel tubing conforming to ASTM A595 Grade A. Options include 11 gauge and 7 gauge. All Welds shall conform to AWS D1.2 using ER70S-6 electrodes.

Base Style

4-Bolt Steel Base Plate of fabricated hot rolled carbon steel conforming to ASTM A36 or equivalent (36 ksi minimum yield) with 2-piece Base Cover and attaching hardware. Base Cover will be fabricated from metal materials.

Handhole

Up To 5.9" Butt Diameters - Reinforced, 3" x 5" Handhole with Cover, Stainless Steel Screw and Back Bar. A Grounding Provision incorporating a tapped 1/2"-13NC hole will be welded to the handhole frame.

6+ Butt Diameters -

Reinforced, 4" x 6-1/2" Handhole with Cover, Stainless Steel Screw and Back Bar. A Grounding Provision incorporating a tapped 1/2"-13NC hole will be welded to the handhole frame.

Anchorage

Anchorage Kit will include four (4) L-shaped Steel Anchor Bolts conforming to AASHTO M314-90 Grade 55. Ten inches (10") of threaded end will be galvanized per ASTM A153. Kits will contain eight (8) Hex Nuts, four (4) Lock Washers, and eight (8) Flat Washers (all components Galvanized Steel). A bolt circle template will be provided.

Vibration Damper

If determined necessary by pole manufacturer an internal, factory installed, Second Mode Vibration Damper will be provided. Customer specification of the damper is available.

Mounting Designation

Side Drill Mount

For Side Drill Mount applications specify luminaire type, quantity and orientation. A luminaire drilling template must be supplied at time of order.

Tenon Mount

For Tenon Mount applications specify both Tenon diameter (2.375", 2.875", 3.5", 4", etc.) and length (3", 4", 5", 6", etc.).

Base Style

4 = 4-Bolt Anchor Base

Finish

BA = Black Powder Coat
 BH = White Powder Coat
 BM = Dark Bronze Powder Coat
 BV = Dark Green Powder Coat
 GC = Gray Powder Coat
 ** = Specify Finish
 00 = Galvanized Only (No Powder Coat)

Galvanization

G = Galvanized

Code "G" to be used only if pole is to be specified "Powder Paint Over Galvanized" or "Galvanized Only".

EPA Notes:

Effective Projected Area (EPA) in square feet. EPA's calculated using wind velocity (mph) indicated in accordance with 2009 AASHTO LTS-5 using a 25 year design life. Maximum EPA is based on the luminaire weight shown. Increased luminaire weight may reduce the maximum EPA. If weight is exceeded, or if other design life or code is required, please consult the factory.

VIBRATION DAMPENERS

Wind Induced Vibration

There are two common types of wind-induced vibration observed in poles: First Mode Vibration and Second Mode Vibration (See illustrations on the right).

First Mode Vibration

In first mode vibration, sometimes referred to as sway, the maximum deflection occurs at the top of the pole. First mode oscillation typically occurs at a low frequency of approximately one cycle per second. Normal deflection of this shape usually is not harmful to the pole or luminaire, but first mode oscillating vibration will cause damage and failure.

Second Mode Vibration

Second mode vibration can be the most damaging form of vibration. It occurs approximately at the midpoint of the pole with the deflection off center equal from side-to-side. It occurs at a higher frequency, typically three to six cycles per second. Second mode vibration occurs when the wind synchronizes with the pole's natural frequency of vibration. This is known as resonance. As the steady low level wind moves past the pole, vortices are shed alternately from either side of the structural shaft causing displacement oscillations in a direction perpendicular to that of the wind. Vortices are a swirling motion or pattern of the wind. The most serious situation arises when the vortex-shedding frequency synchronizes with the natural period of vibration in the pole, which can ultimately fatigue the pole to structural failure.

Vortex Shedding

Wind induced vibration can be caused by steady, relatively low-speed wind (10-30 mph), by topography and by the structure to which the pole is mounted or nearby structures. Destructive vibration is not an indication of substandard material, workmanship or design of pole.

First Mode Vibration

Second Mode Vibration

Vibration Dampers

Venture Lighting is proud to offer industry-leading steel poles to coordinate with our area lighting LED luminaires. Venture Lighting has partnered with an industry leader in pole design and manufacturing. Our partner's decades of research and testing has led to the knowledge and background to assure that customers receive the safest, longest lasting pole designs.

To minimize the effects of first or second mode vibration, manufacturers have developed dampers which very effectively quell wind induced vibration of lighting poles.

Free Vibration Test Curves

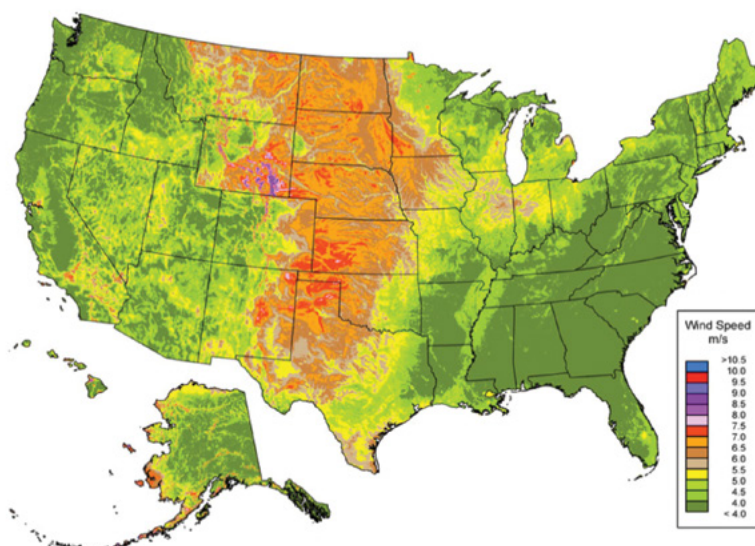

Free Vibration Test of Pole with No Added Dampening

Free Vibration Test of Pole with Impact Damper

Department of Energy Wind Map

Locations with high average wind speeds are more prone to pole vibration problems than locations with high maximum wind speeds. Areas of high average wind speeds can be identified on the U.S. Department of Energy Residential Scale 30 Meter Wind Map which can be accessed at the U.S. Department of Energy website.

The average wind speeds indicated on this map are model-derived estimates that may not represent the true wind resource at any given location. Small terrain features, vegetation, buildings and atmospheric effects may cause the wind speed to depart from the map estimates. Expert advice should be sought in placing wind turbines and estimating their energy production.

Source: Wind resource estimates developed by AWS Truepower, LLC. Map developed by NREL.
Spatial resolution of wind resource data: 2.0 km. Projection: Albers Equal Area WGS84.

VIBRATION DAMPENERS, GFI OPTIONS, WIND MAP

1st Mode Vibration Dampeners

(PA56127)

Venture Lighting's pole partner's patented First Mode Vibration Damper is field installed at the top of square poles. This damper very effectively reduces first mode vibration of square lighting poles. Due to potential vibration fatigue issues that can be associated with moderate wind conditions, **First Mode Dampers are recommended for square poles with mounting heights greater than 25' and for square poles with light loading fixtures less than 2.0 EPA.**

First Mode Vibration Damper

First Mode Vibration Damper

First Mode Vibration

2nd Mode Vibration Dampeners

(PA56128)

The Venture Lighting's Pole Partner's Second Mode Damper was awarded the industry's first patent in the vibration damping category in 1972.

The Second Mode Damper is attached to the pole at approximately the midpoint of the pole, and can be factory bolted inside the pole or field mounted on the inside or outside of an existing pole. Based on past experience, some Venture Lighting poles include factory installed Second Mode Vibration Dampers as a standard component. **If the poles you intend to order are to be bridge mounted, used as camera poles, or may be subject to unusual site conditions, wide open terrain, steady or high energy prevailing winds,** or other site conditions as mentioned, please make Venture Lighting aware of these conditions. Or, if your installed poles are exhibiting oscillation, contact Venture Lighting to pursue a damping solution that may include installing a Venture Lighting Second Mode Damper on the poles.

Second Mode Vibration Damper

Second Mode Vibration

GFI Options

For customers who would like an option to power holiday decorations, speakers for a street event, or other small equipment used for pole or street maintenance, a 120V GFCI receptacle can be mounted into the pole. The receptacle is a 20 Amp 120V Duplex GFCI and is weather resistant (WR) and UL approved.

GFCI Receptacle

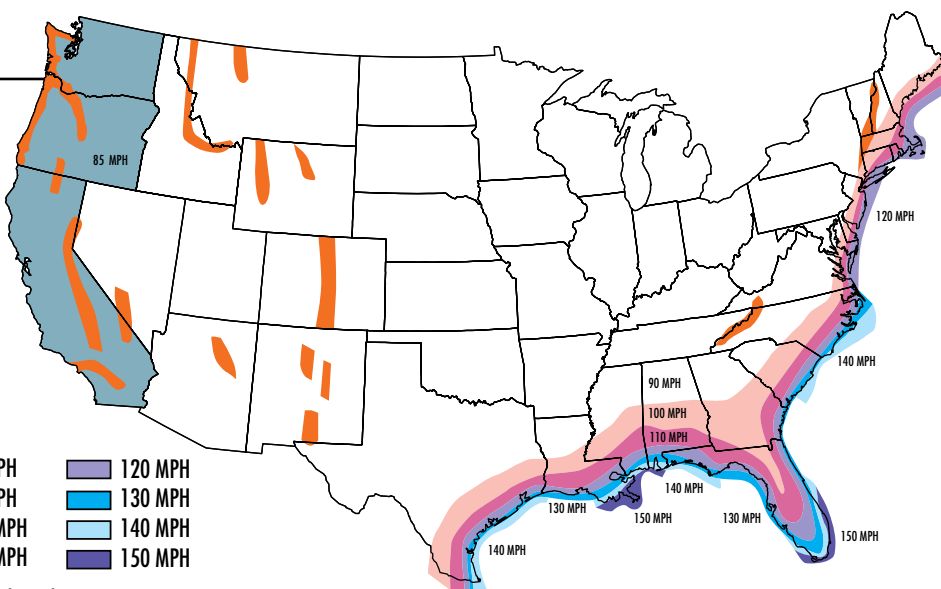

GFCI Receptacle mounted to pole

Wind Map

2009 AASHTO LTS-5 specification 3-second gust basic wind speeds (mph) with gust effect factor (G) of 1.14 and 25 year design life wind map (ASCE 7-05) is shown above. This wind map should be used to determine wind velocity for your specific location. If you are located between two different velocity isotach lines, the higher velocity should be used. Local isolated high wind conditions can be devastating to poles and luminaires not designed for such conditions. Additionally, constant winds in the 10-25 mph range can severely damage certain poles and luminaires by vibration. Follow the guidelines shown in the map.

Wind Speeds - Other Regions

ACCESSORIES FOR POLE OPTIONS

Spokes Designed to mount on a 2 3/8" dia. pole top tenon - All spoke tenon diameters are 2 3/8"

Description: Single Spoke Arm
Order Code: SP1H6BZ
Color: Bronze
Weight: 5 lbs.

Description: Twin Spoke Accessory
with 90° Arms
Order Code: SP2H906BZ
Color: Bronze
Weight: 8 lbs.

Description: Twin Spoke Accessory
with 180° Arms
Order Code: SP2H1806BZ
Color: Bronze
Weight: 7.28 lbs.

Description: Triple Spoke Accessory
with 90° Arms
Order Code: SP3H906BZ
Color: Bronze
Weight: 11.22 lbs.

Description: Triple Spoke Accessory
with 120° Arms
Order Code: SP3H1206BZ
Color: Bronze
Weight: 10 lbs.

Description: Quad Spoke Accessory
with 90° Arms
Order Code: SP4H906BZ
Color: Bronze
Weight: 14 lbs.

Bullhorns Designed to mount on a 2 3/8" dia. pole top tenon - All bullhorn tenon diameters are 2 3/8"

Description: Double Bullhorn with
180° Arms
Order Code: BH2V180BZ
Color: Bronze
Weight: 12 lbs.

Description: Triple Bullhorn with 180° Arms
Order Code: BH3V180BZ
Color: Bronze
Weight: 18 lbs.

Description: Quad Bullhorn with 180° Arms
Order Code: BH4V180BZ
Color: Bronze
Weight: 28.16 lbs.

ACCESSORIES FOR POLE OPTIONS

Cross Arms Designed to mount on a 2 3/8" dia. pole top tenon - All cross arm tenons are 4" tall with 2 3/8" diameter

Description: Cross arm with
Twin 180° Vertical Tenons
Order Code: CA42V180BZ
Color: Bronze
Weight: 18 lbs.

Description: Cross arm with
Triple 180° Vertical Tenons
Order Code: CA43V180BZ
Color: Bronze
Weight: 27.78 lbs.

Description: Cross arm with
Quad 180° Vertical Tenons
Order Code: CA44V180BZ
Color: Bronze
Weight: 40.92 lbs.

Description: Cross arm with
Quad 90° Vertical Tenons
Order Code: CA44V90BZ
Color: Bronze
Weight: 29.1 lbs.

Wall Mounting Brackets

Description: Wall Mount Bracket
Order Code: WM1H4BZ
Color: Bronze
Weight: 2.87 lbs.
Tenon Dia.: 2 3/8"

Description: Wall Mount 90° Bracket
Order Code: WM1V906BZ
Color: Bronze
Weight: 6 lbs.
Tenon Dia.: 2 3/8"

Single Pole Top Fitters Straight Square Poles

Description: Single Vertical Tenon
for 4" Square Pole
Order Code: TN4SQ1V4BZ
Color: Bronze
Weight: 7 lbs.
Tenon Dia.: 2 3/8"

Description: Single Vertical Tenon
for 5" Square Pole
Order Code: TN5SQ1V4BZ
Color: Bronze
Weight: 9 lbs.
Tenon Dia.: 2 3/8"

Pole Top Fitters for 4" Straight Round Poles

Description: Single 2 3/8" Dia. Vertical Tenon
for 4" Round Pole
Order Code: TN4RD1V4238BA
Color: BRONZE
Weight: 5 lbs.

Pole Top Fitters for 5" Straight Round Poles

Description: Single 2 3/8" Dia. Vertical Tenon
for 5" Round Pole
Order Code: TN5RD1V4238BA
Color: BRONZE
Weight: 8.14 lbs.

Benefits and Features

- 40,000 hours rated life; up to twice the life of most regular Metal Halide products
- Quartz metal halide
- Excellent maintained lumens with up to 114 LPW
- Ultimate retrofit solution
- Cuts maintenance costs nearly in half, while doubling life and lumen maintenance

Sports Lighting Lamps

Enclosed Rated Sports Lighting Lamps

Order Code	Watts	Product Description	Bulb	Base	Bulb Finish	Operating Position	CCT	ANSI Code	Case Pack

Benefits and Features

- Brighter - High lumen output
- "Extra Life" lamp available - Venture's MH 1500W/U/XL lamp has a 6000 hour rated life
- Venture's Sports 60 lamps are designed for sports lighting aiming angles
- High lumen output lamps for efficient layout designs
- Good color rendition (65-70 CRI)

Energy Master Energy Saving Retrofit Lamps

HID TECHNICAL INFORMATION

Proper Use of Metal Halide Lamps

Correct Operation and Warnings For High Intensity Discharge Lamps:

High intensity discharge (HID) lamps require auxiliary equipment (ballasts, capacitors and ignitors) to provide the correct electrical values for starting and operating. This auxiliary equipment shall meet the requirements of all relevant Venture specifications, NEMA/ANSI standards and safety standards. Venture Lighting International is not responsible for poor performance, personal injury, property damage, burns or fire from lamps operating on unapproved auxiliary equipment or from lamps being operated in a manner inconsistent with the lamp design.

Power should always be turned off, and preferably locked out, in accordance with OSHA guidelines whenever installation, removal or maintenance is performed on lighting systems. Safety glasses and gloves should be used when installing or removing HID lamps. Lamps should be installed firmly into appropriate lamp sockets, without over-tightening, to avoid loosening from vibration.

HID lamps and arc tubes operate at extremely high temperatures and may shatter as a result of misapplication, system failure or other factors. Scratches on the outer bulb, direct contact with water or excessive installation pressure can cause lamps to break. Breakage may release extremely hot glass and lamp parts into the surrounding environment and raise the risk of fire, personal injury or property damage. Injury may also be caused by ultraviolet energy from an unjacketed HID lamp. If the outer jacket should break, immediately turn the power off. Do not remove a lamp until it has completely cooled; then replace it with a new Venture Lighting® lamp. In areas susceptible to contamination by flying glass, where flammable materials are present, or where there is a possibility of personal injury, users should seek additional protective measures by using open fixture (Type-O) lamps and enclosed luminaires.

Luminaire Requirements and Operating Positions

It is imperative that users adhere to specified luminaire and lamp operating positions and requirements. The operation of lamps in positions other than those specified can result in severe reductions in lamp performance, including lamp life, light output and color. Incorrect operating positions can also create the possibility of an early failure.

Refer to each lamp's technical data specification sheet to determine the correct operating position and luminaire requirements. Also, refer to the diagrams on this page to determine allowable operating positions.

Federal Compliance - Metal Halide Lamps:

Venture Lighting lamps comply with USA Federal Standard 21 CFR 1040.30 and Canada Standard SOR/80-381. The FDA requires the following safety warning statement for all metal halide lamps:

"WARNING: This lamp can cause serious skin burn and eye inflammation from shortwave ultraviolet radiation if outer envelope of the lamp is broken or punctured and the arc tube continues to operate. Do not use where people will remain for more than a few minutes, unless adequate shielding or other safety precautions are used. Lamps that will automatically extinguish when the outer envelope is broken or punctured are commercially available."

Careful adherence to the previously mentioned precautions may not eliminate all possible risks associated with the use of metal halide lamps, but it will reduce the likelihood of personal injury or property damage.

Warning Notices:

WARNING: THESE INSTRUCTIONS MUST BE FOLLOWED TO AVOID POSSIBLE EARLY FAILURE OF THE LAMP. Venture Lighting will not be responsible for poor lamp performance, personal injury, property damage, burns or fire resulting from failure to follow these instructions.

- Operate lamp in the specified burning position with compatible electrical equipment. The ANSI code on the Venture lamp must match the code on the ballast or luminaire. If in doubt, consult with Venture Lighting or the luminaire manufacturer.
- Operate pulse start metal halide lamps with appropriate pulse start metal halide ballasts and lampholders that can withstand a 4000 volt pulse. The substitution of standard probe start (non-pulse start) metal halide lamps will result in poor performance and is not recommended.
- Operate high pressure sodium lamps with appropriate high pressure sodium ballasts and lampholders that can withstand a 4000 volt pulse (except 600W, 750W, and 1000W lamps which require lampholders that can withstand a 5000 volt pulse).
- Electrically insulate any metal bulb supports in the luminaire to avoid decomposition of glass.
- Protect lamp from direct contact with rain, sleet or snow to avoid breakage from thermal shock.
- This is a vacuum-jacketed lamp and may implode if broken; avoid skin contact with broken lamp pieces. Wear safety glasses and gloves when installing or removing high intensity discharge lamps.
- Install lamp firmly, but not forcibly, into the socket to minimize loosening from vibration.
- Do not use excessive force as the glass bulb may break.
- During lamp replacement, turn power off and let lamp cool before removal to avoid potential electrical shock and/or burns.

- Replace bulb if scratched, cracked or damaged.
- If the outer envelope breaks or is punctured and lamp continues to operate, immediately turn power off and remove lamp after it has cooled.

HID TECHNICAL INFORMATION

End-of-Life and Reduction of Risk

At end-of-life, the vast majority of metal halide lamps will simply fail by not reigniting. On rare occasions, metal halide lamps may fail in a violent manner. The possibility of this type of failure is significantly reduced by group re-lamping at or before the rated end of life (see Group Re-lamping). In any application where enclosed rated (Type-E) lamps are operated continuously (24 hours per day, seven days per week), the lamps should always be turned off for a period of at least 15 minutes each week; this precaution can reduce the possibility of violent failures. This procedure is not required with Venture's open rated (ANSI Type-O) shrouded lamps. These lamps are easily identified by the prefix "MP," "MPI," "MPL," "MPE," "MPSE" or "MPC" in the lamp description code.

Starting and Restarting Characteristics

Venture's Uni-Form® pulse start metal halide lamps start at an ambient temperature of -40°C (-40°F) or higher. Full light output does not occur immediately when power is applied to any metal halide lamp; after starting, there is a time delay of at least three to six minutes before lamps reach full light output.

After lamps have started, a power interruption of 1/4 cycle (1/240th of a second) or more may cause the lamps to extinguish. Several minutes are required before an arc can be re-established by the ballast and full light output achieved. The exact time is dependent on a number of

factors including lamp wattage, ballast and ignitor characteristics, ambient temperature, fixture dimensions and supply voltage.

The time needed to establish full light output can be as short as three minutes and as long as 15 to 20 minutes. Venture's exclusive Uni-Form formed-body arc tube provides warm-up and hot re-strike in up to 60% less time than standard probe start metal halide lamps.

Lamp Life

Lamp life is an important consideration when purchasing a new, retrofit or replacement lamp. Two very different and distinct terms describe life: "rated life" and "economic life."

Rated Life

Rated life for metal halide lamps is a value of lamp life expectancy based on laboratory and field tests of representative lamps, operating on approved ballasts, with a burn cycle of at least 10 hours per start. The lamp life is determined when 50% of metal halide lamps initially installed are still operating

Operating Position

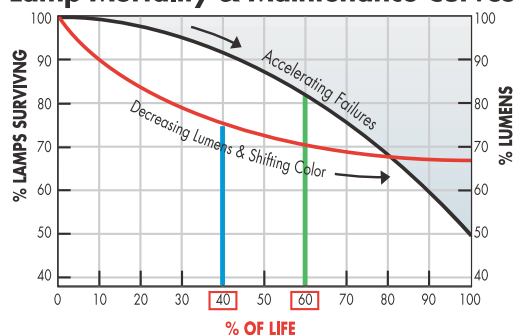

Various operating conditions affect lamp life. One key factor is operating position. Position-oriented lamps (designed to operate in one specific position) are tested and rated based on that designated position; operating these lamps in any other position can dramatically shorten life, reduce lumen output and cause color shift. Lamps designated universal can be operated in any position, however, life expectancy and lumen output are sacrificed in certain positions;

published "rated life" for universal lamps is based on operation in the vertical position, "rated life" for universal lamps operated horizontally is 75% of the published rating.

Economic Life

Economic life refers to the hours of operation during which a lamp is designed to provide optimum light output and color quality as well as lowest replacement cost. Economic life describes actual lamp life better than rated life because rated life does not account for the lumen depreciation and color shift that occur as lamps age. The economic life of lamps is generally 60% to 75% of the lamp rated life. Though economic life is important when considering a lighting system, lamp data tables show rated life because they provide a comparison with other lamp manufacturers' ratings.

Lamp Mortality & Maintenance Curves

HID TECHNICAL INFORMATION

Group Relamping

Effective Lighting Management

Group re-lamping offers significant savings in time and labor costs over spot replacing single failed lamps. Regularly scheduled maintenance based on economic lamp life keeps a lighting system functioning at its maximum.

This provides:

1) Optimum Light Output:

Light levels are at peak performance when a lighting installation is new. Many standard probe start metal halide lamps decrease to as low as 25% of initial light output by the end of rated life. A number of factors may accelerate this reduction in efficacy (lumens per watt). Group re-lamping at economic life keeps the light levels from dropping significantly; it also provides an opportunity to remove dirt accumulation in the luminaire. Cleaning during group re-lamping saves time and helps maintain optimum light levels. A cleaner, well-lit environment increases safety and security, contributes to higher worker productivity and creates a better impression for visitors.

2) Aesthetic Quality:

The quality of light changes over economic life; most of this shift occurs in the last 25% of rated life. This causes old lamps to appear blue or pink, especially when compared to new lamps. All the lamps in an area will generally change color together. However, lamps that are spot replaced will look noticeably different than those around them.

3) Optimum Energy Efficiency:

While the light output of a metal halide lamp decreases over the life span, the lamp will still consume the same (or sometimes more) electricity. Since energy is the largest cost of lighting, group re-lamping prevents almost half of the energy from being wasted by under-performing lamps. For example, a 400 watt lamp may consume \$800 of electricity over its rated life. After 60% of rated life, about \$320 is wasted on lamps providing less than mean lumens. Spot re-lamping wastes energy dollars; the cost of a new lamp and the labor to install it as part of group re-lamping is generally less than 5% of the total energy cost.

4) Cost Effective Replacement:

Group re-lamping, as a planned maintenance program, reduces labor costs and interference with facility operations. Spot re-lamping often takes an employee away from regular duties to replace a single burned out lamp; this inconvenience grows as lamp failures increase towards the end of rated life. Group re-lamping eliminates workday disruptions, allowing re-lamping to take place during normal shutdown periods. Also, group re-lamping at economic life is a practical way to sustain workers' visual acuity with a bright workplace environment.

HID TECHNICAL INFORMATION

Group Relamping

Effective Lighting Management

Group re-lamping offers significant savings in time and labor costs over spot replacing single failed lamps.

Open Rated Lamps

Open luminaires offer significant advantages over enclosed luminaires. They do not require cover lenses which reduce light output and accumulate dirt. In addition, enclosed luminaires make lamp replacements more difficult. For safety, open luminaires need open rated (ANSI Type-O) metal halide lamps.

To reduce the risk of liability, lighting specifiers need to be aware of the criteria for a true open rating and what the Type-S or Type-O designations indicate about lamp construction.

ANSI Lamp Designations

The American National Standards Institute (ANSI) currently classifies metal halide lamps with three possible ratings: Type-O, Type-S and Type-E.

Type-O open fixture rated lamps characteristics:

1. There is a shroud around the arc tube, which helps prevent damage to the outer bulb in the event of an arc tube rupture.
2. The base is open fixture rated, such as an EX39 mogul base or narrow neck bulb with a medium base, both of which require special exclusionary sockets.
3. They pass the ANSI C78.389 lamp containment test, where arc tubes are forcibly ruptured and must be contained within the outer jacket.

All "MP," "MPI," "MPL," "MPE," "MPSE" and "MPC" lamps produced by Venture Lighting meet the requirements to be rated Type-O and can be used with confidence.

Type-S lamps do not include internal protection against failure. These lamps are not permitted in new open luminaires, according to UL1598 and the NEC.

Type-E lamps are rated for use only in enclosed luminaires.

Type-O

Type-E, S

In September 2010, UL1598 became effective with requirements for open metal halide luminaires and Type-O lamps. These requirements are the same as those in the 2005 National Electrical Code (NEC) published by the National Fire Protection Agency (NFPA).

NEC section 410.73(F)(5) states that "Luminaires (fixtures) that use a metal halide lamp other than a thick-glass parabolic reflector lamp (PAR) shall be provided with a containment barrier that encloses the lamp, or shall be provided with a physical means that only allows the use of a lamp that is Type-O."

Open luminaires require sockets that only accept Type-O lamps (pink EX39 mogul sockets or E26 narrow neck medium sockets) in order to prevent accidental use of Type-S or Type-E lamps.

We Build Lighting Systems With Safety in Mind!

For over 20 years, Venture has been leading the way by producing metal halide lamps that contain protective shrouds. Venture Lighting provides the industry's widest selection of lamps that meet ANSI C78.389 testing requirements for a rating of Type-O. Venture is building lighting systems with the safety of you and your customers in mind.

Venture's Open Rated Lamp Benefits

Venture's MP, MPI, MPL, MPE, MPSE and MPC lamps:

- Meet requirements of the UL1598 and the National Electric Code
- Meet ANSI criteria for a Type-O rating
- No luminaire lens required, delivering more light - Lumen loss with a lens is up to 16%
- Can be operated continuously; no shut off required
- Contain shrouds with most wattages
- Operate in open or enclosed luminaires

Ruptured arc tube contained within the intact outer jacket of a Venture MP lamp

WARRANTY INFORMATION

LED Lamps and Retrofit Kits Warranty Information

This Venture Lighting product is warranted for the period of 5 years, as specified, from the date of purchase against defects in material and workmanship. The determination of whether the product is defective shall be made by Venture Lighting.

This limited warranty shall only apply if the Venture Lighting product has been installed and operated (i) in

LED Product Type	Rated Life	Warranty Period	Usage
LED T8 Lamps	50,000 hrs	5 years	12 hrs/day annually
LED Retrofit Lamps	50,000 hrs	5 years	12 hrs/day annually
LED Downlight Kits	35,000 hrs	5 years	12 hrs/day annually

compliance with the specifications and guidelines set forth herein, on the product label and packaging, and on the Venture Lighting website, (ii) in accordance with the National Electric Code (NEC), the Standards for Safety of Underwriters' Laboratory, Inc. (UL), the Standards for the American National Standards Association (ANSI), or in Canada, with the standards of the Canadian Standards Association (CSA), and (iii) in lighting equipment designed and approved for the application and in environmental conditions within the normal specified operating range of the product.

This limited warranty does not apply to loss or damage to the product caused by: negligence; abuse; misuse; mishandling; improper installation, storage, or maintenance; damage due to fire or acts of God; vandalism; civil disturbances; power surges; improper power supply; electrical current fluctuations; corrosive environment installations; induced vibration; harmonic oscillation or resonance associated with the movement of air currents around the product; alteration; accident; failure to follow installation, operating, maintenance or environmental instructions.

The warranty terms contained herein shall be the sole and exclusive remedy of the purchaser of Venture Lighting products and state Venture Lighting's entire liability and obligation to such purchaser. NO WARRANTY OF FITNESS FOR ANY SPECIFIC OR PARTICULAR PURPOSE IS MADE OR IS TO BE IMPLIED. NO OTHER WARRANTIES APPLY.

If the product is defective, this product will be repaired or replaced, at Venture Lighting's option. This warranty is expressly limited to the repair or replacement of the product. This warranty gives the customer specific legal rights, which vary from state to state and province to province. No distributor, salesperson, dealer, retailer or other representative has the authority to change or modify this warranty, either orally or in writing, in any respect.

WARRANTY IS VOID IF PRODUCT IS NOT USED FOR THE PURPOSE FOR WHICH THIS PRODUCT IS DESIGNED.

LED Fixtures Warranty Information

This Venture Lighting product is warranted for the period of 5 years, as specified, from the date of purchase against defects in material and workmanship. The determination of whether the product is defective shall be made by Venture Lighting. A Venture Lighting product will not be considered defective under this warranty solely because a small number of separate LED components fail to operate (i.e. provide light) when the number of such failed components is less than 10% of the total number of light emitting components which are part of the product.

This limited warranty shall only apply if the Venture

Lighting product has been installed and operated (i) in compliance with the specifications and guidelines set forth herein, on the product label and packaging, and on the Venture Lighting website, (ii) in accordance with the National Electric Code (NEC), the Standards for Safety of Underwriters' Laboratory, Inc. (UL), the Standards for the American National Standards Association (ANSI), or in Canada, with the standards of the Canadian Standards Association (CSA), and (iii) in lighting equipment designed and approved for the application and in environmental conditions within the normal specified operating range of the product.

This limited warranty does not apply to loss or damage to the product caused by: negligence; abuse; misuse; mishandling; improper installation, storage, or maintenance; damage due to fire or acts

of God; vandalism; civil disturbances; power surges; improper power supply; electrical current fluctuations; corrosive environment installations; induced vibration; harmonic oscillation or resonance associated with the movement of air currents around the product; alteration; accident; failure to follow installation, operating, maintenance or environmental instructions.

The warranty terms contained herein shall be the sole and exclusive remedy of the purchaser of Venture Lighting products and state Venture Lighting's entire liability and obligation to such purchaser. NO WARRANTY OF FITNESS FOR ANY SPECIFIC OR PARTICULAR PURPOSE IS MADE OR IS TO BE IMPLIED. NO OTHER WARRANTIES APPLY.

If the product is defective, this product will be repaired or replaced, at Venture Lighting's option. This warranty is expressly limited to the repair or replacement of the product. This warranty gives the customer specific legal rights, which vary from state to state and province to province. No distributor, salesperson, dealer, retailer or other representative has the authority to change or modify this warranty, either orally or in writing, in any respect. WARRANTY IS VOID IF PRODUCT IS NOT USED FOR THE PURPOSE FOR WHICH THIS PRODUCT IS DESIGNED.

Poles Warranty Information

See Venture Lighting's website for pole warranty information

HID Lamp Warranty Information

1. Upon receipt and/or initial installation by the customer, Venture Lighting International will replace any lamp determined to be defective in materials, workmanship, or proper operating parameters.

2. Venture Lighting will replace any lamp that fails within one year from the purchase date (based on 5000 hrs./yr. operation) when the failure is determined to be lamp related (applies to lamps with life ratings of greater than 7500 hrs.).

3. During economic life, Venture Lighting will supply replacement lamps for failed lamps in excess of the failure rate projected by life expectancy curves, when the lamps are operated correctly and in accordance with the guidelines outlined in this technical guide.

All performance ratings are based on lamp testing at rated watts, under controlled conditions, using primary AC electrical circuits with the highest quality auxiliary equipment. The performance of any lamp may vary somewhat under typical service conditions. All lamp specifications and ratings are subject to change without notice.

Limited Warranty on HID Ballasts

Venture® ballast products are warrantied free from manufacturing and workmanship defects for a period of two years from the date of shipment. During this period, Venture will, at its option, repair or replace ballast products which prove to be defective or out of specification. This warranty is granted by Venture only to the original purchaser or first end-user of such ballast products.

HID Product Type	Warranty Period	This warranty is conditional upon installation, maintenance and operation in accordance with Venture's
Lamps	One Year	
All SPL Lamps	Two Years	
Magnetic Ballasts	Two Years	

instructions and specifications set forth in the purchase order or contract at the time of order and in accordance with the standards of The National Electric Code (NEC), Underwriters' Laboratory, Inc. (UL) and the American National Standards Institute (ANSI) and, in Canada, with the standards of the Canadian Standards Association (CSA). Damage by misuse or abnormal conditions of storage, installation, maintenance or operation, including, but not limited to, excessive temperatures or evidence of partial or complete disassembly beyond normal maintenance or expansion procedure void this warranty in its entirety. The conditions of any tests performed concerning any ballast product claimed to be defective in accordance with the terms of this warranty shall be mutually agreed upon in writing between the original purchaser or first end-user and Venture and Venture may be represented at any such test.

No implied statutory warranty of merchantability or fitness for a particular purpose shall apply beyond the afore-mentioned warranty period. This warranty excludes other warranties, expressed or implied and is the exclusive remedy of the claimant. Venture shall not be liable for any special, indirect or consequential damages. Venture's liability on any claim of any kind, nature or description arising out of, resulting from or concerning any aspect of this warranty agreement or from the product or services furnished hereunder shall not exceed the price of the specific ballast or ballasts which give rise to the claim. For warranty service or repair, the buyer shall prepay all shipping charges to Venture and Venture shall pay shipping charges to return the repaired or replaced item to the buyer. However, the buyer shall pay all shipping charges, duties and taxes for products returned to Venture from a country other than that of the United States of America.

HID Product replacement/liability limits

The foregoing warranty shall be the sole and exclusive remedy of the purchaser and Venture's sole and exclusive remedy to the purchaser. NO WARRANTY OF FITNESS FOR ANY SPECIFIC OR PARTICULAR PURPOSE IS MADE OR IS TO BE IMPLIED. NO OTHER WARRANTY APPLIES. Venture will not, under any circumstance, whether as a result of breach of contract, warranty tort or otherwise, be liable for any costs or damages, including lost profits or revenues, incidental, special or consequential damages.

Some states or provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which may vary from state to state and province to province. No distributor, salesperson, dealer, retailer or other representative has the authority to change or modify this warranty, either orally or in writing, in any respect.
